All the hardware you need, one single system

Connect your entire operation
before, during, and after every event:
from pre-sales to the bar, on a single
platform.

The Operating System for the industry

Sales & POS: speed and reliability

V3 MIX

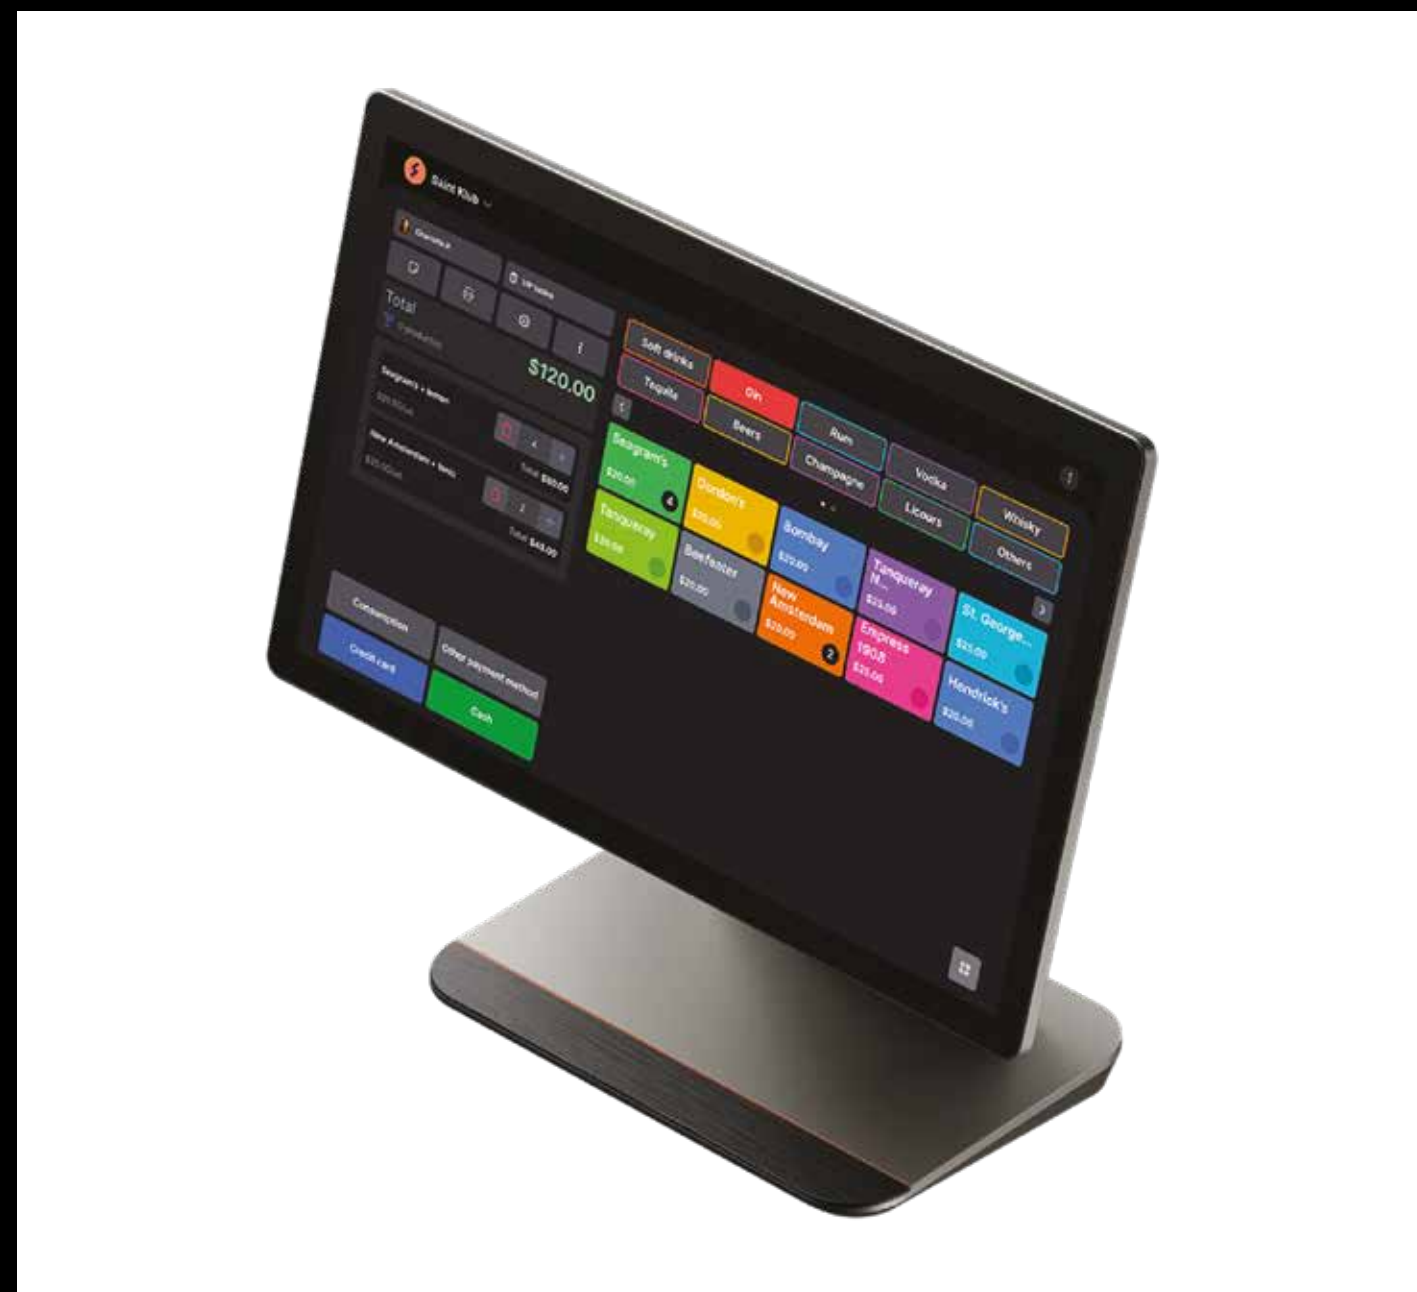

All-in-one mobile solution with integrated tablet and printer. Perfect for VIP table management.

★ Tap2pay

D3 PRO

Premium countertop terminal for fixed points of sale. Its high-resolution display ensures fast, seamless order management.

CPAD

High-performance tablet for order management, reservations, and operations. Highly versatile with multiple use cases thanks to its accessories. Its rugged build withstands intensive use in fast-paced, dynamic environments.

★ Tap2pay

Secure, integrated payments

AMS1

Pocket-sized Android payment terminal for processing transactions on the go.

S1F2

Premium portable card reader with built-in receipt printer.

NYC1

Ultra-compact card reader for mobile sales. Accepts contactless payments quickly, securely, and friction-free.

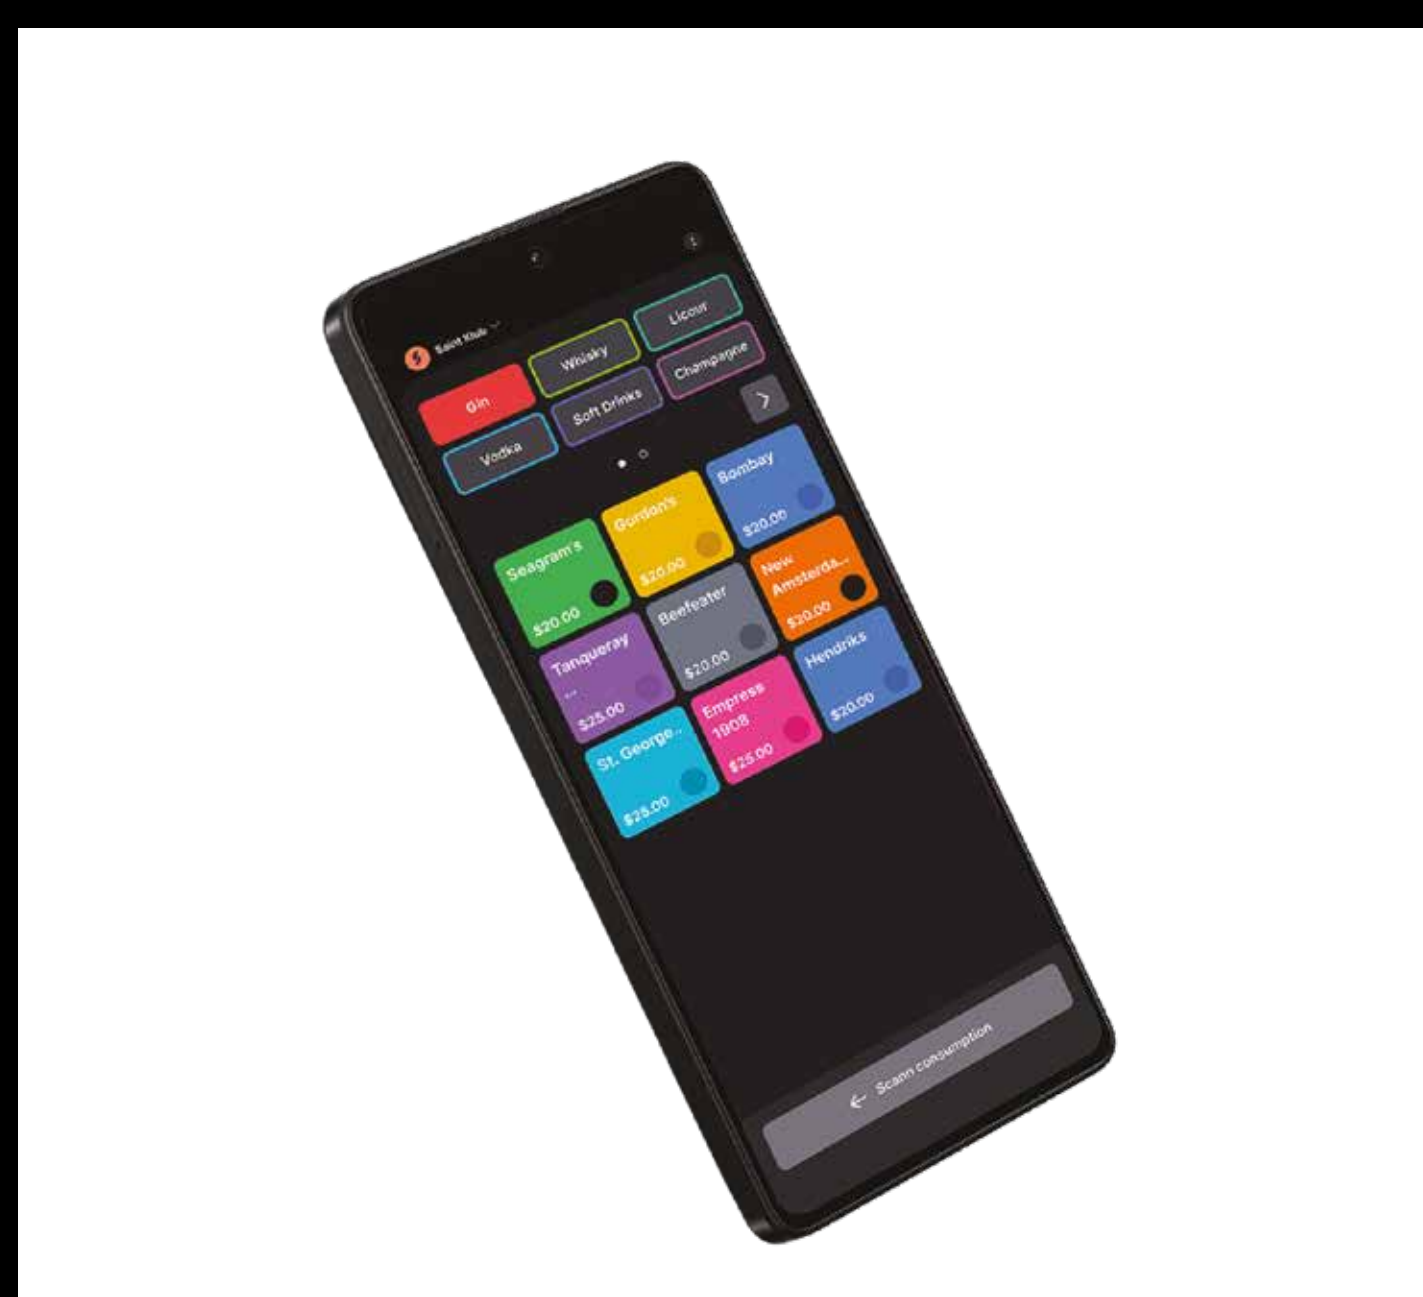

Peripherals designed for your operation

Motorola G75 5G

Ultra-rugged smartphone with MIL-STD-810H military-grade certification and IP68 rating. Ideal for multiple workflows thanks to 5G connectivity and a high-brightness display (1,000 nits) readable in direct sunlight.

★ Tap2pay

Scanner 2D

Handheld reader optimized for validation. Its CMOS sensor scans QR codes quickly from mobile screens, even under direct sunlight.

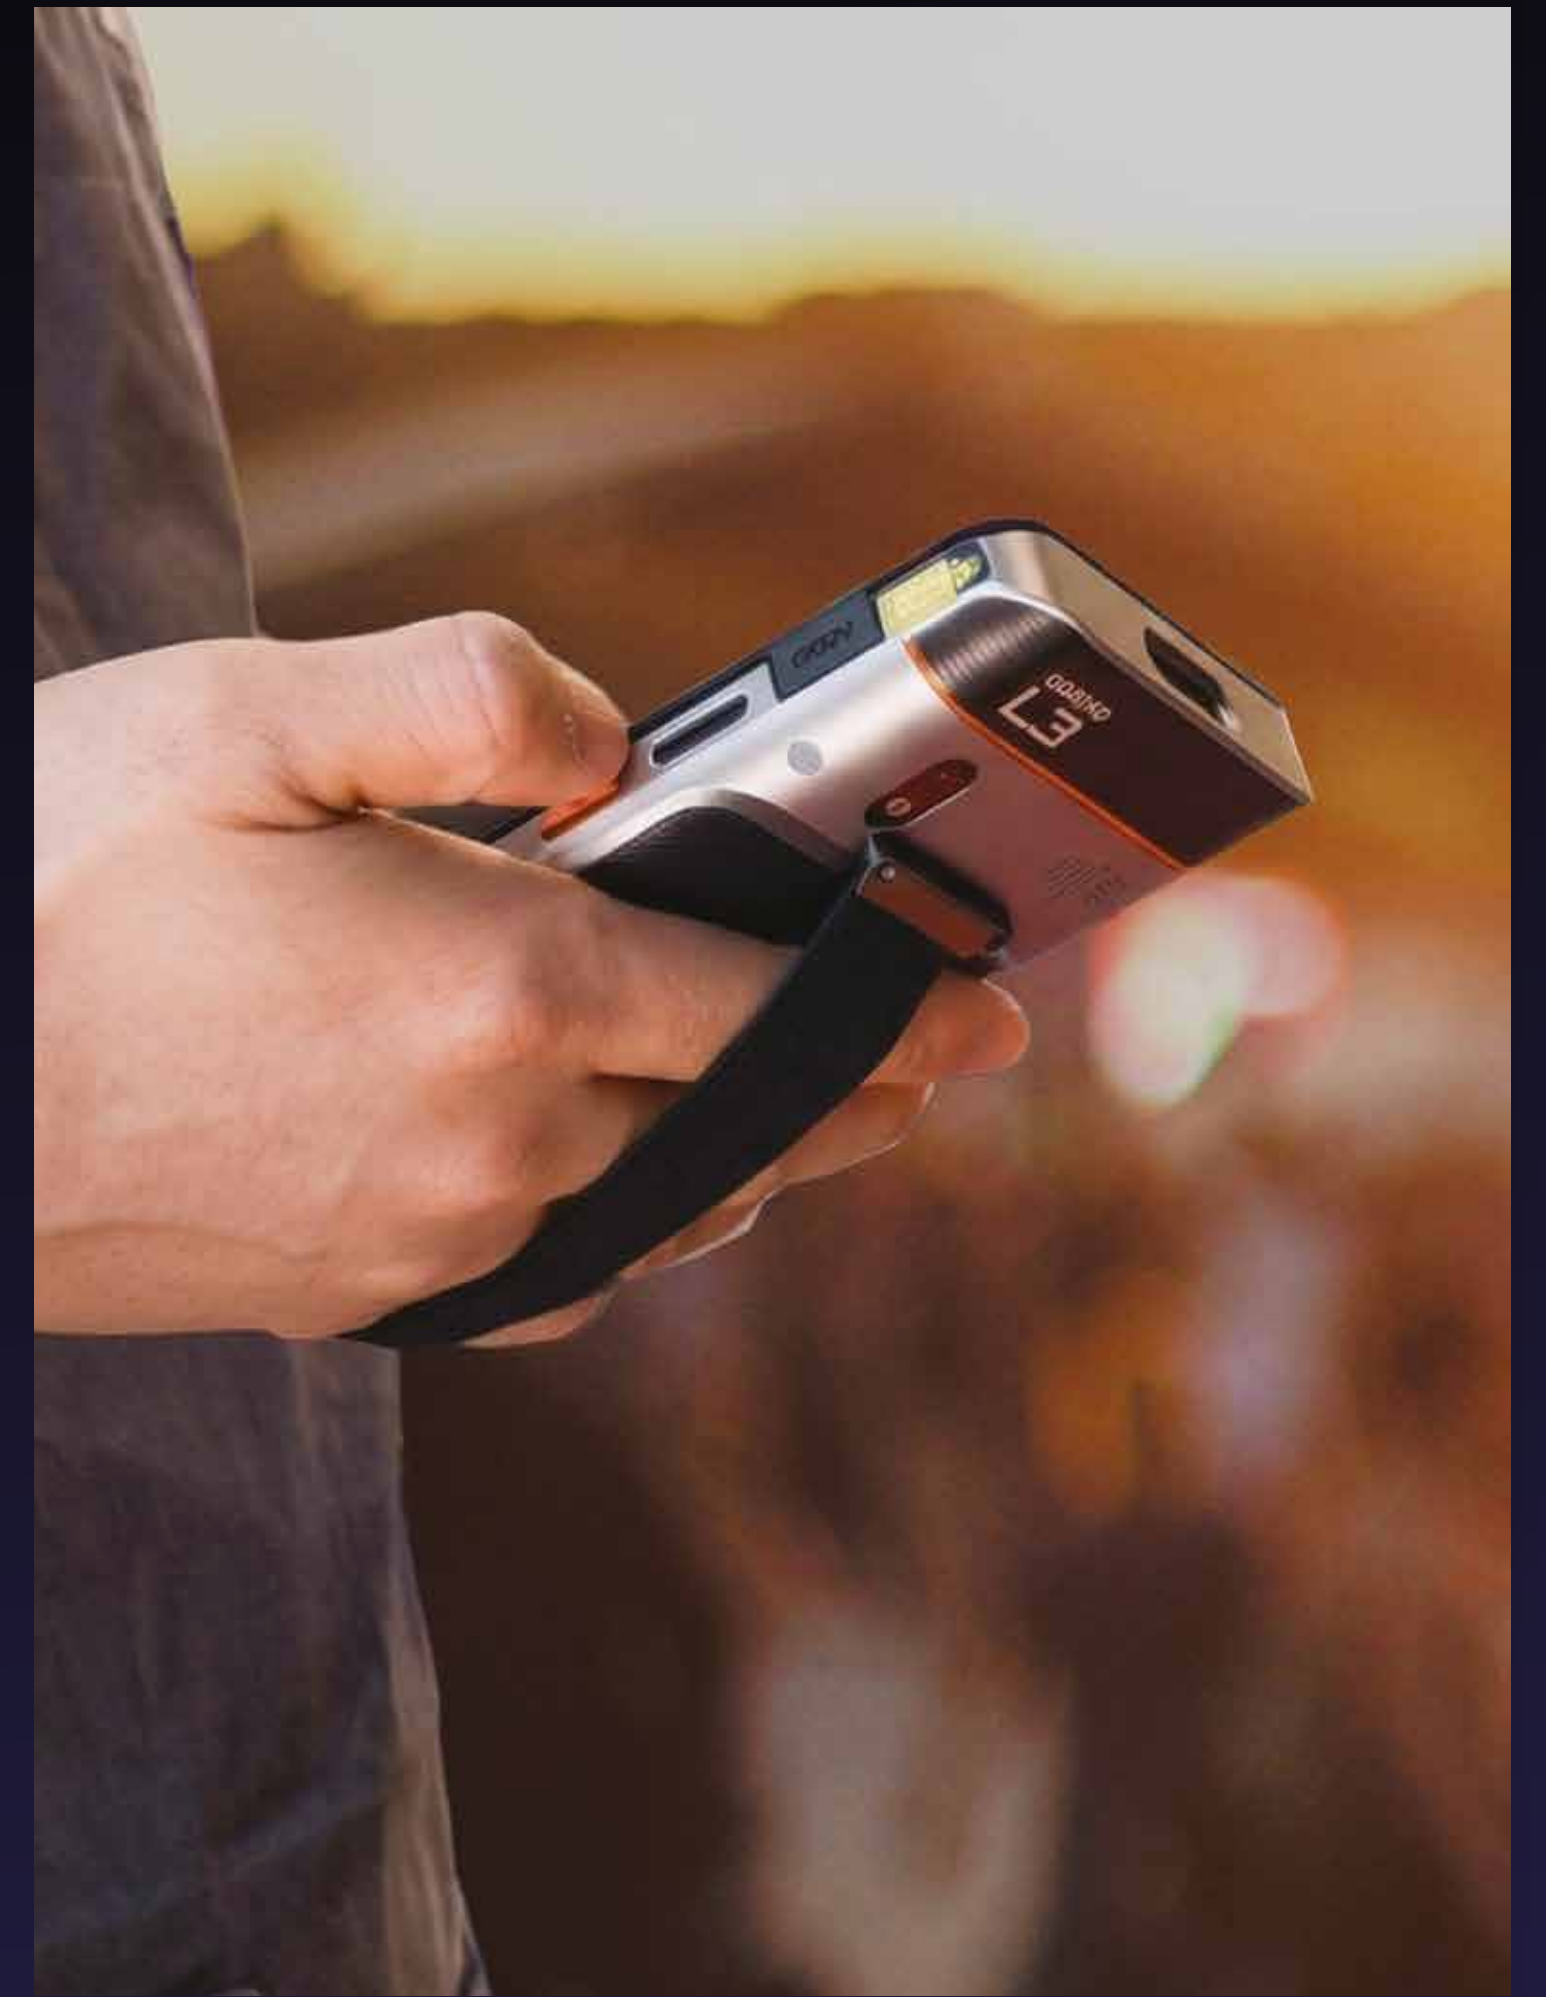

Cloud Printer

80 mm thermal printer with cloud technology. Ideal for printing tickets or add-ons at the box office and points of sale.

★ Festival edition

Mobile

Ultra-rugged smartphone with MIL-STD-810H military-grade certification and IP68 rating. Ideal for multiple workflows thanks to 5G connectivity and a high-brightness display (1,000 nits) readable in direct sunlight.

★ Tap2pay

Top-up Kiosk

Self-service top-up terminal that lets attendees manage their payments independently, reducing queues at bars and service points.

PDA L3

Rugged handheld terminal with a 5.5" display, built-in 1D/2D scanner, and long-lasting battery. With IP65 protection and full connectivity (4G, Wi-Fi, Bluetooth, GPS), it's ideal for high-speed operations.
